INTERNSHIP REPORT

CORE JAVA INTERNSHIP

BANKING INFORMATION SYSTEM

Submitted by	Lakshay Rana
Programme	B.Tech – Computer Science and Engineering
Institute	[IILM University]
Roll Number	[25SCS1003002821]
Batch	[2cse14]
Organization	upSkill Campus, with UniConverge Technologies Pvt. Ltd.
Internship Period	08 September 2026 – 08 October 2026

Submitted in partial fulfilment of the academic internship requirement.

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to upSkill Campus and UniConverge Technologies Pvt. Ltd. for providing me the opportunity to undertake the Core Java Internship. I am thankful to the mentors and coordinators associated with the programme for the guidance and practical exposure provided during the internship.

I also acknowledge the collaboration of the All India Council for Technical Education (AICTE), as stated on my completion certificate. This internship helped me connect Java programming concepts with a practical project and improve my understanding of object-oriented programming.

I am grateful to my college, faculty members and family for their support and encouragement.

Student Name: Lakshay Rana
Programme: B.Tech – Computer Science and Engineering
Signature: LAKSHAY

2.6 System Design and Workflow
2.7 Implementation Overview
2.8 Testing and Output
2.9 Learning Outcomes
2.10 Conclusion
3. Bibliography / References
4. Annexures – Offer Letter and Completion Certificate

1. INTERNSHIP COMPLETION CERTIFICATE

The completion certificate issued to Lakshay Rana records successful completion of the Internship Program from 08-09-2026 to 08-10-2026. It identifies the domain as Core Java and states that the candidate participated in hands-on training and real industry project work. The certificate records collaboration with the All India Council for Technical Education (AICTE), UniConverge Technologies and upSkill Campus.

The original completion certificate is included in the annexures of this report.

2. PROJECT DESCRIPTION

2.1 Introduction

This report describes the Core Java Internship undertaken through upSkill Campus in collaboration with UniConverge Technologies Pvt. Ltd. The offer letter is dated 08 September 2026 and identifies the role as Core Java Intern. The completion certificate records the internship period as 08 September 2026 to 08 October 2026. The offer letter lists the location as Remote.

The practical project associated with the internship is a console-based Banking Information System developed using Java. The application demonstrates a menu-driven approach to handling account information and basic banking operations. It is an educational project for practising Java syntax and object-oriented programming.

2.2 Organization Profile

According to the offer letter, upSkill Campus, along with its industry partner UniConverge Technologies Pvt. Ltd., offered the Core Java internship. The offer letter specifies remote work and working hours of 10:00 AM to 6:00 PM. The completion certificate also records collaboration with AICTE.

2.3 Internship Objectives

The learning objectives were to strengthen practical understanding of Core Java, practise object-oriented programming, accept and process user input, organize program logic through methods, and implement a simple menu-driven application. The project also provided practice in compiling, executing and checking a Java program.

2.4 Problem Statement

The project demonstrates how a basic banking application can organize account information and provide menu options for common operations. It is a local console application and is not connected to a real bank, financial network or production banking system.

2.5 Technologies and Tools Used

Programming language: Java
Concepts: Classes, objects, constructors, encapsulation, methods, conditional statements and loops
User input: Java Scanner class
Execution: JDK, Java compiler and terminal / PowerShell

2.6 System Design and Workflow

The program first accepts the account number, account holder name and initial balance. It then displays the main menu. The user enters a menu choice, and the program selects the corresponding operation. The menu is repeated until the user selects Exit.

Main menu:
1. Display Account Details
2. Deposit Money
3. Withdraw Money
4. Check Balance
5. Exit

2.7 Implementation Overview

The project is organized around a BankAccount class that stores the account number, account holder name and balance. Private data members support encapsulation. A constructor initializes the account information when an account object is created.

Separate methods handle displaying account details, depositing money, withdrawing money and checking the balance. The main method manages input through Scanner and controls the menu flow. Conditional logic selects the operation and displays an invalid-choice message when the menu selection is not supported.

2.8 Testing and Output

In the terminal output shared for this report, the program accepted account number 100, account holder name LAKSHAY and initial balance 500000. The menu was displayed. When 500 was entered as the menu choice, the program displayed “Invalid choice.” This observed test demonstrates handling of an unsupported menu selection.

The available evidence confirms the initial input, menu display and invalid-choice response. Successful deposit and withdrawal output screenshots were not provided, so this report does not claim specific transaction results.

2.9 Learning Outcomes

The project provided practice in writing and running Java programs, using classes and objects, initializing objects with constructors, applying encapsulation, organizing logic into methods, accepting keyboard input with Scanner, and controlling program flow with loops and conditional statements. It also provided experience in identifying and correcting basic programming errors.

2.10 Conclusion

The Core Java Internship provided an opportunity to apply programming fundamentals through a practical Banking Information System project. The project demonstrates a basic menu-driven application and reinforces object-oriented programming concepts. It served as a useful exercise in translating Java concepts into a working console-based program.

Internship Offer Letter

Date: **08-09-2026**

Name: **Lakshay Rana**
Email: **ranalakshay913@gmail.com**
Location: **Remote**

Dear **Lakshay Rana** ,

We are pleased to inform you that **Upskill Campus** alongwith its industry Partner **UniConverge Technologies Pvt. Ltd.** has agreed to provide you internship as **Core Java Intern**
Your appointment of service is based on the following terms and conditions.

1. The internship shall start from **08-09-2026**
2. **Internship:** The internship period will be 4 to 6 weeks, starting from the date of joining.
3. **Working Hours:** The internship runs from 10:00 AM to 6:00 PM.

On behalf of both the Company, we wish you every success in your position and trust that our relationship will be long and mutually rewarding.

Sincerely
For Upskill Campus and UniConverge Technologies Pvt. Ltd.

UNICONVERGE TECHNOLOGIES PVT.LTD NOIDA

Prabha Singh
HR Manager

INTERNSHIP

CERTIFICATE OF COMPI

awarded to

Lakshay Rana

for successfully completing the Internship Program from **08-09-2026** to **08-10**

During this internship, the candidate actively participated in hands-on training of **Core Java**

This program was conducted in collaboration with **All India Council for Tec** **UniConverge Technologies** & **upSkill Campus.**

Certificate ID: USC22555TIA
